Kelvin Lee Yi Xiang

SUMMARY

A Computer Science graduate and current **Cloud Engineer** at Hong Leong Bank specializing in business solutions and cloud architecture. With a background in web development and automated systems, I am proficient in building scalable payment and remittance systems using **GCP, Node.js**, and **AI-driven automation**.

EXPERIENCE

April 2025 - April 2026

GCP Cloud Software Developer Hong Leong Bank

Kuala Lumpur, Malaysia

- **Cloud Architecture:** Architecting and deploying scalable payment-to-payment and remittance systems using **Google Cloud Platform (GCP)** services like **Compute Engine** and **Cloud Run**.
- **Full-Stack Development:** Engineering high-performance backends with **Node.js (Fastify)** and dynamic frontends using **Next.js** and **Tailwind CSS**.
- **AI & Automation:** Implementing **Python-based AI prompt engineering** to power advanced **OCR** (Optical Character Recognition) systems, automating data extraction and analysis for banking workflows.
- **Data Management:** Designing and maintaining robust relational databases using **MySQL** and **PostgreSQL** to support high-frequency financial transactions.

January 2025 - March 2025

LEARNING & DIGITAL ADMINISTRATOR UOA Academy Sdn Bhd

Petaling Jaya, Selangor

- Developed custom scripts for certificate generation and auto-emailing.
- Integrated and maintained course materials in LMS and resolved technical issues.
- Designed and optimized digital assets in accordance with brand guidelines.

November 2022 - January 2023

UI/UX Developer YouthsToday Sdn Bhd

- Designed user-friendly interfaces and created interactive web pages utilizing **JavaScript, HTML, and CSS**.
- Applied UX principles to optimize user experience across web platforms.

November 2020 - March 2021

Business Development Executive VVV Event Management Sdn Bhd

- Assisted in devising sales strategies aligned with market trends, enhancing competitiveness.
- Conducted performance reviews to identify areas for improvement and drive team success.
- Developed solutions for customer inquiries, resulting in increased client satisfaction and loyalty.

CERTIFICATIONS

- Introduction to Ethics in Banking
- Graduate Diploma in Computer Science
- Awards of Completion for SAS Training
- Awards of Completion for Cisco Training
- Dean's Honor Roll

EDUCATION

01/2025

Bachelor of Computer Science Swinburne University of Technology

01/2022

Diploma in Computer Science INTI International University & Colleges (INTI)

PROJECTS

Working Experience

Remittance RCS: An OCR-powered data extraction solution designed to optimize the end-to-end remittance workflow. By automating manual entry, it enhances operational accuracy, boosts efficiency, and delivers significant cost savings.

PtoP (Procure-to-Pay): A claim-based documentation ecosystem that streamlines end-to-end delivery and automated comparisons, ensuring full visibility and reconciliation across the entire process.

College Journal
